Chief, SR/

5 November 1959

Chief, REAC

25X1A6a

1. Attached is a cost estimate breakdown covering rehabilitation of the subject location for use by SR/. This estimate encompasses only that work necessary to prepare those facilities, utilities, and structures required for Phase I occupancy of the station.

25X1A8a

2. Although Phase I occupancy calls for utilizing only a limited number of the buildings which exist, station utility systems (water, sewage, electrical, telephone, etc.) must be reactivated and repaired in their entirety.

3. It should be recognized that a substantial share of this cost estimate includes provisions for correcting deficiencies in plumbing, heating, and electrical systems which later become evident as a result of more extensive inspection and testing.
